

IS YOUR KITCHEN READY FOR TEMPLATING ?

In order for our fitters to be able to do their job efficiently and template your kitchen accurately the following requirements are essential:

- All units must be in place – they must be fixed and not removed between the templating and fitting of your granite worktops.
- All units must be perfectly level.
- Sink(s), hobs, and any other appliances that sit in the granite must be available to take accurate measurements.
- If the sink is under mount the unit below must have a solid top sunk down 2mm from top of the unit and to allow a 5mm tolerance for the sink cut-out, the sink must be in place but not fitted.
- Any taps that are going to be fitted through the granite worktop must be available in order for holes to be accurate.
- Nothing should be altered between templating and fitting:
- Any boxing in of pipework should be done either before templating or after fitting.
- Any plastering of walls should be done either before templating or after fitting.
- There must be sufficient support if there are no units batons are required. Our templater will discuss and advise you on this matter if required but it will not be possible to fit your worktops unless our templater is satisfied that you have sufficient support. If you wish our fitters to fit your batons please discuss with templater – there will be an additional charge
- Taps need to be disconnected during templating & fitting

Additional Requirements for Replacement Worktops On Existing Units

- The hob must be disconnected.
- The sink must be disconnected. (Excluding under mount sinks.)
- All the old worktops must be removed before we can come out to template for your granite worktops.

As all our products are hand-made and each case has its own individual requirements the above are a necessity that keeps the cost of your granite worktop down as much as possible.

Our fitters are not covered by insurance to do any plumbing or connections of hobs so therefore are not permitted under any circumstances to fit or disconnect your appliances.

If any of the above are not as specified we cannot take responsibility for your kitchen worktops being fitted accurately or being fitted in the timescale promised.

If you have any queries or would like to discuss any of the above requirements with our technical advisor please don't hesitate to call 01745 890888.
